

FDD

FRILO.Document.Designer

The FRILO.Document.Designer - FDD is a standalone program for managing, integrating and editing PDF-based documents. The program can not only be used to document FRILO projects, but also as a universal tool for creating a PDF document from various sources.

Function overview

- Organize and structure the documents of a structural project
- Include the output/results of FRILO solutions
- Include external documents and applications (PDF, graphics, etc.)

- Different page headers/footers definable
- Automatic page numbering
- Fixable page numbers
- Show and hide sections for reduced document variants
- applications such as
 - Word / Excel,
 - Open Office etc.
 can be started with a double-click, contents can be edited
- Automatic table of contents
- Title page, introductory remarks and additional comments optional
- Direct start of toolboxmodules
- Sync with tablets through the StaticsToGo app

Die FRILO-App StaticsToGo

This FRILO app for tablets synchronizes the statics documents between PC and tablet. Whether at the construction site or at a meeting - the current project documentation is always included. Notes can be inserted along the way for later processing.

STG for Android and iPad

The app is available free of charge for Android (Google Play Store) and for iPad (iTunes).

Features

- Insert chapters/documents
- Layout with own templates and formatting

Send static document as mail

Move chapter by drag & drop

Self-defined title page

Automatic table of contents

The individual items in a chapter

Active: Show / hide individual parts

The screenshot shows the software interface with a toolbar, a project tree on the left, and a main document area. The project tree lists chapters like 'Titel - Family House', 'Contents', 'Remarks', 'load assumptions', 'top floor', and 'ground floor'. The main area displays a title page for 'Static calculation' with contact information for FRILO Software GmbH. A callout points to a table of contents within the document.
